

CVEC Round 6 RFP for Solar and Battery Systems

ADDENDUM #2 dated 2.12.2024 Posted 8.45 am

The following applies to all municipalities and the Martha's Vineyard Airport in the CVEC Round 6 RFP:

Systems enrolled in Municipal Competitive Electric Supply Agreement.

For systems that will be installed behind existing electric meters, the electric accounts associated with those meters are included in municipal competitive electric supply agreements (MCESA) for all requirements power supply (which includes capacity).

The accounts are currently enrolled in a MCESA through July 2024 and have signed an additional MCESA that will begin July 2024 meter reads through July 2026 meter reads. As a result, these accounts will not be able to take advantage of any potential ICAP tag savings associated with battery energy storage until the accounts July 2026 meter read dates.

The supply rate is 13.665 cents for the July 2024-2026 contract.
